Save approx. ₹5500 on your Electricity Bill annually.

TATA POWER-DDL launches Airconditioner Replacement Scheme

In order to promote energy efficiency among households and bring down the power consumption in national capital, Tata Power Delhi Distribution Ltd (TPDDL) has launched a scheme offering up to 50 per cent discount on energy-efficient air conditioners.

This scheme would be available only for 20,000 customers on first-come-first-serve basis.

Only customers who recorded an average monthly consumption of up to 1,200 units per month during the period of April to September 2014 can avail this scheme.

Under the scheme, TPDDL consumers in North and North-West Delhi can get discount of 50 per cent on BEE 5-star rated ACs, Inverter ACs in exchange of their non-star ACs.

This scheme is applicable for both window and split ACs of 1 & 1.5 ton on various models of ACs from leading brands such as Voltas, Hitachi and Godrej.

The scheme has been offered to households as the domestic sector accounts for almost 50 per cent of energy consumption in Delhi and ACs power consumption is a key component of the same.

TPDDL consumers can avail the scheme against their CA numbers (one AC per CA Number) mentioned in the electricity bills.
