

December 2019

CII National CSR Summit

Mr. Piyush Goyal, Head (Corporate Services) was one of the panelists at the CII National CSR Summit organized on 12th December 2019 at Hyatt Residency, Bikaji Cama Place, Delhi. The discussion was on the topic of 'Addressing Air Pollution: Industry Action through CSR'. He highlighted the role and scope of CSRs in India's fight against the increasing menace of Air Pollution. In addition, a display-cum-selling unit of Tata Power's newly launched Dhaaga project was set up at the summit. The stall displayed products like kurtas, skirts, palazzos etc. made by Self-Help Group (SHG) women. It received an overwhelming response and sold products worth Rs. 8000/-.

Electrical Training for ITI students

Tata Power-DDL's SIG organized a two months training program for students of ITI Jahangirpuri, Pusa, Dheerpur and Narela from 15th December '19. The aim of the program is to make them familiar with the professional world and give them a glimpse of the technical processes. Currently, 142 students are participating in the training program, in which they have been assigned to different district & zonal offices and are being imparted with knowledge on various operational & technical processes.

Hands of Warmth: Clothes Donation Drive

Tata Power-DDL strives to serve the community in all possible ways, thus a clothes donation drive was conducted across all office locations to provide warm clothes to the homeless people in this winter season. SIG extends a heartfelt thanks to all employees for collectively donating approx. 2000 clothes which were further distributed in JJ clusters across all 12 districts with the help of VT centers.

Certificate distribution for TCS- BPS level Employability program trainees

Head (Corporate Services) awarded certificates to all twenty-three (23) trainees on successful completion of the Tata Consultancy Services (TCS)-BPS Level Employability training on 5th December, 2019 at Cenpeid. Post training, the TCS HR team conducted a recruitment process for the trainees, where five (5) of these trainees qualified for placement at BPS level jobs in TCS. Rest are being considered for other placement opportunities at Taj Hotels and other group companies.

Winners of Quiz Time for the month of NOVEMBER

KIRAN PAWAR (Finance) **RAVINDER KUMAR** (Corp. Vigilance) **HARISH KUMAR GUPTA** (NEG)

Congratulations to all the winners!!

Passionate people, Compassionate hands

Meter Management Group(Rohini)-

With an aim to reduce rate of hunger in India, MMG RHN DC-1 location started Roti Bank initiative on 25th Oct, 2019. The employees and BA staff practice double lunch system, where they bring an additional packet with 2

rotis and pickle. All the packets are collected in a box and handed over to the NGO partner- Roti Bank to be distributed among the poor so that no one sleeps empty stomach. The initiative started with only 5 packets but now has expanded to 50 packets per day. This practice is being considered to be implemented in all other locations.

Social Innovation Group applauds the efforts of such motivated employees & encourages others to come up with innovative volunteering activities.

Do you know? Water Purification Methods -Shamshad Ahmed (SIG)

When reverse osmosis is not available, there are 5 water purification methods:-

- 1. Boiling-In this method, clean water should be boiled and left to boil for 1-3 minutes.**
- 2. Filtration-This method uses chemical and physical processes to purify water, filtration is considered effective when it comes to selective elimination of much smaller molecular compounds such as chlorine and pesticides.**
- 3. Distillation- This method uses heat to collect pure water in the form of vapor. This vapor is directed into a condenser to cool. It gets reversed into liquid water that is clean and safe for drinking. This method is effective in removing bacteria, germs, salts, heavy metals such as lead, mercury and arsenic.**
- 4. Chlorination-kills germs, parasites and other disease-causing organisms found in ground or tap water.**
- 5. Use Ultraviolet Light-This looks similar to a small flashlight. You just swish it around in the water for a few minutes and the bacteria can already be killed.**

Sustainable Development Goals

Quiz Time!

- Name the initiative started by MMG?
- Electrical training for ITI students is related to which SDG?
 - SDG 2
 - SDG 4
 - SDG 8
- How many students were given BPS level employability training? Kindly send your responses & queries at monika.tayal@tatapower-ddl.com by 20th January, 2020.
